

**Video Title:** The Intern Experience

**Video Descriptions:** Three Merck employees across three generations discuss their first career experiences with Merck and how those experiences shaped their professional development.

\*\*\*Arthur Burson, VP of Global Engineering Services, Manufacturing\*\*\*

I joined the company 25 years ago as an entry level engineer in the utilities group my initial assignment was in Rahway, New Jersey at our manufacturing site there.

\*\*\*Heather Brauer, Marketing Manager, Diabetes International Marketing Team\*\*\*

:14

I interned in 2002 I was in the market research group in marketing, where did you have your internship?

\*\*\*Francisco Saenz, Associate Analysts\*\*\*

:24

My internship with Merck was in viral vaccine manufacturing so I was actually supporting the set up of the bulb manufacturing facility in building 12.

Heather

:35

My responsibilities covered secondary research in the area of obesity and understanding some of the medical needs in that area.

Arthur

:44

The internship it's really is a two way street it's really a chance for the intern to look at us as a company but its also a great opportunity for us to take time and spend 8 or 12 weeks with an intern.

Heather

:56

What I appreciated especially about being here for 6 months I able to interact with many people not only in the market research area but in other functional areas, marketing teams, public affairs, outcomes research that sort of thing.

Francisco

1:10

I did one internship but in reality I experienced 70 different departments within Merck because they develop that friendship with people and tell you well this is exactly what I'm doing.

Arthur

1:20

When I look back over my career I think what's kept me at Merck are the people. This is a very dynamic industry and its an industry where you really have the ability to impact the quality of human life.

Francisco

1:36

Most of my experience was in the bio-mechanical research so I went to school and I did bio-mechanical engineering so the internship for me was a good opportunity to really experience the manufacturing world. 1:56
